## **Birth Control Method Options**

MOST EFFECTIVE

- MODERATELY EFFECTIVE

LEAST EFFECTIVE

Clients considering their birth control method options should understand the range and characteristics of available methods. Providers can use this chart to help explain the options. Clients should also be counseled about the benefits of delaying sexual activity and reducing risk of STDs by limiting the number of partners and consistently using condoms.

			partners and consistently using condoms.			
METHOD	What is the risk for pregnancy?*	How do you use this method?	How often is this used?	What are menstrual side effects?	Are there possible side effects?	Other things to consider?
	.5 out of 100	Surgical procedure	Once	No menstrual side effects	Pain, bleeding, risk of infection	Permanent
	.15 out of 100					
	.2 out of 100	Placed inside uterus	Up to 6 years	Spotting, lighter or no periods	Some pain with placement	No estrogen May reduce cramps
	.8 out of 100		Up to 10 years	May cause heavier periods		No hormones May cause cramps
	.05 out of 100	Placed in upper arm	Up to 3 years	Spotting, lighter or no periods		No estrogen May reduce cramps
	4 out of 100	Shot in arm, hip, or under the skin	Every 3 months	Spotting, lighter or no periods	May cause weight gain	No estrogen May reduce cramps
PILL	8 out of 100	Take by mouth	Every day at the same time	Can cause spotting for the first few months Periods may become lighter	Nausea, breast tenderness Risk for VTE (venous thromboembolism)	May improve acne May reduce
РАТСН	9 out of 100	Put on skin	Weekly			menstrual cramps Lowers ovarian
	9 out of 100	Put in vagina	Monthly			and uterine cancer risk
	12 out of 100	Put in vagina with spermicide	Every time you have sex	No menstrual side effects	Allergic reaction, irritation	No hormones
	13 out of 100	Put over penis	Every time you have sex Every day	No menstrual side effects	Allergic reaction, irritation	No hormones No prescription
WITHDRAWAL	20 out of 100	Pull penis out of vagina before ejaculation			No side effects	No hormones Nothing to buy
	21 out of 100	Put inside vagina			Allergic reaction, irritation	No hormones No prescription
SPONGE	24 out of 100	Put inside vagina				
FERTILITY AWARENESS- BASED METHODS	24 out of 100	Monitor fertility signs and abstain or use condoms on fertile days			No side effects	No hormones Increased awareness of fertility signs
SPERMICIDES	28 out of 100	Put inside vagina	Every time you have sex		Allergic reaction, irritation	No hormones No prescription

\*The number of women out of every 100 who have an unintended pregnancy within the first year of typical use of each method. Other methods of birth control: (1) Lactational Amenorrhea Method (LAM) is a highly effective, temporary method of contraception; and (2) Emergency Contraception: emergency contraceptive pills or a copper IUD after unprotected intercourse substantially reduces risk of pregnancy.
