

# Evidence-Based Teen Pregnancy Prevention Programs at a Glance

Sexual activity	Number of sexual partners	Contraceptive use	Pregnancies	STIs (including HIV)	Technology needed (audio-visual/internet)	Parent engagement	Service learning project	Condom demonstration
-----------------	---------------------------	-------------------	-------------	----------------------	---	-------------------	--------------------------	----------------------

This table provides a snapshot of program models that have undergone a Teen Pregnancy Prevention Evidence Review (TPPER) and been approved as evidence-based programs (EBPs). Teen Pregnancy Prevention Program (TPP) grantees can use this table as a starting point to narrow down the list of EBPs that may be a good fit for their organization and community; they should also do a thorough review of any EBP they consider, including the study that supports the evidence. Learn more on the [Teen Pregnancy Prevention Evidence Review website](#).

**Note:** The TPPER is updated on an ongoing basis. This resource reflects findings released in the April 2023 review.

Program Name	Program Type	TPPER Outcomes					Duration of Outcomes	Activities				Train-the-trainer	Train-the-facilitator/educator	# of Sessions	Session Length	Program Duration	Setting	Intended Population	Age	Languages
