

# Approaches to Standardized Screening for Reproductive Desires Job Aid

This job aid presents four evidence-based and person-centered screening approaches for determining client reproductive desires. Screening for reproductive desires is recommended for every client during the initial visit and regularly thereafter as determined by client need. Each approach prompts a provider to initiate a shared decision-making conversation focused on a client's reproductive health needs. Understanding the nuances of each of the four approaches will enable providers to decide which one makes the most sense to use with a client, as well as within a particular community and health care setting.

## Is your agency funded by the Title X Program?

Clients who respond to a reproductive desires screening question(s) qualify as a Title X Program client for Family Planning Annual Report (FPAR) purposes.

SAMPLE TOOLS	TOOL CONTENT	CONSIDERATIONS
<b>Reproductive desires</b>		
<b>Parenthood/ Pregnancy Attitude, Timing, and How important is pregnancy prevention (PATH)<sup>1</sup></b>	<i>Three questions:</i> 1. Do you think you might like to have (more) children at some point? 2. When do you think that might be? 3. How important is it to you to prevent pregnancy (until then)?	<ul style="list-style-type: none"> <li>• Can be used for people of any gender</li> <li>• Time frame open to client interpretation</li> <li>• Pregnancy prevention-oriented</li> <li>• Allows for client ambivalence</li> <li>• Can be modified to be applicable to both people who have never had children and people who already have children</li> <li>• No structured response options, open-ended conversation</li> <li>• Subsequent questions can be modified based on answers to previous questions</li> <li>• Job aids, videos, and other resources available through the RHNTC and Envision SRH in the public domain at no cost</li> <li>• Does not directly address preferred method of contraception</li> </ul>
<b>One Key Question (OKQ)<sup>2</sup></b>	<i>Single question/prompt:</i> Would you like to become pregnant in the next year? You can answer yes, no, unsure, or okay either way.	<ul style="list-style-type: none"> <li>• Not applicable for people who cannot become pregnant; not gender-neutral</li> <li>• Time-oriented</li> <li>• Can be programmed into the electronic health record (EHR) and used in conjunction with electronic clinical quality measures (eCQMs)</li> <li>• Most-studied of these approaches and studies showed it had minimal impact on clinical workflow during its implementation.</li> <li>• OKQ training and resources, including follow-up prompts, available through Power to Decide for a cost</li> <li>• Less allowance for client ambivalence</li> <li>• May lead to bias in screening</li> <li>• May miss those wanting pregnancy within 12 months, but not presently</li> </ul>
<b>Service-based</b>		
<b>Self-Identified Need for Contraception (SINC)<sup>3</sup></b>	<i>Single question/prompt:</i> We ask everyone about their reproductive health needs. Do you want to talk about contraception or pregnancy prevention during your visit today?	<ul style="list-style-type: none"> <li>• Can be used for people of any gender</li> <li>• Timeline open to client interpretation</li> <li>• Allows for client ambivalence</li> <li>• Can be programmed into the EHR and used in conjunction with eCQMs, in addition to being a stand-alone needs assessment question</li> <li>• <a href="#">Implementation resources</a>, including follow-up prompts, available through University of California San Francisco Person-Centered Reproductive Health Program in the public domain for no cost</li> </ul>
<b>Reproductive Health Services-Based Screening Question (RHSSQ)<sup>4</sup></b>	<i>Single question/prompt:</i> Can I help you with any reproductive health services today, such as preventing pregnancy or planning a healthy pregnancy?	<ul style="list-style-type: none"> <li>• Can be used for people of any gender</li> <li>• Allows for client ambivalence</li> <li>• Allows for an expansive range of SRH services by allowing clients to identify the services they want and reduces risk of provider bias</li> <li>• Least studied question of those included in this table, however, studies confirmed that clients interpreted the question as it was intended</li> </ul>
