* In this survey, "male" refers to people assigned male at birth. It's important to keep in mind that there are many people whose gender identity does not match their assigned sex at birth. This means that some people who don't identify as male may be seen for "male" SRH services.

- Male physical exam, including the genital/perianal exam
- Sexual and reproductive health issues and concerns for men who have sex with men and transgender clients
- Other (specify): _____

6. What is your biggest challenge or concern in serving male clients?

7. What kinds of support would help address this challenge or concern?

8. What additional support, if any, would help you to better serve male clients?
