Click on the measure you would like to compare. The shown measure is underlined.

Choose to see data as histogram or bar chart here.

Your grantee's data is highlighted in blue. Other orange bars represent all other Title X grantees.

72% of Title X grantees have higher rates of most or moderately effective contraceptive use among female users 15-19 years than your agency.

Data interpretation is provided here.

Click on the arrow to select an age group.

Enter your performance data in the white boxes to chart your performance over time on the run chart. Note: there are two age groups for each contraceptive use measure.

What does your agency's performance look like over time?

Enter data to see your agency's performance over time compared to the national average on the run chart below:

% 15-19 year-olds using most/moderately effective methods

% 20-44 year-olds using most/moderately effective methods

% 15-19 year-olds using LARC methods

% 20-44 year-olds using LARC methods

% <25 year olds screened for chlamydia

Date of data collection:
